

JANG JP SERIES • SINGLE ROW

Jang JP1 seeder

The single-row push seeder that became the market-garden standard. It opens a furrow, drops seed at a set spacing, covers it and firms the soil in one pass, from carrots and arugula up to peas and corn.

WHAT SETS SPACING

- **Seed roller:** hole size matches the seed; the number of holes (3 to 24) sets the range.
- **Sprockets:** a front and rear sprocket in the chain box fine-tune spacing from 0.5" to 20".
- **Brush:** start down; raise only for textured seed like beets.

ACCESSORIES

Kickstand, double-disc opener for heavy soil or residue, extra hoppers (one per crop saves setup time), row marker.

SPECIFICATIONS

Maker	Jang Automation, South Korea
Rows per pass	1
Weight	About 25 lb
Frame	Steel
Hopper	0.26 gal, clear, lidded, quick-release
In-row spacing	0.5" to 20" (roller + sprockets)
